

Applied Critical Fluids GmbH

LARGE PHARMA CLAMP ACF-C01075

We have a disposable clamp to be utilized on large bag tubing. The component is meant to seal off the fluid path on tubing with a simple unlocking feature to open the fluid path.

Typical applications that this large clamp might be used for consist of but are not limited to: biopharmaceutical manufacturing and pharmaceutical processes; disposable filtration systems; mixing containers and vessels; assemblies and tubing sets.

Features/Benefits

Controls fluid flow

Variety of tubing sizes - from 3/4" to 1 1/2" (external tube dimensions) 1/8" wall

Secure lock

Reusable durability, disposable economy

Autoclave and irradiation stable* Manufactured utilizing Makrolon 2458 WH Polycarbonate Resin

Ability to add a tamper evident tie

**Recommendation* – do not clamp tubing during irradiation or autoclave cycle, distortion may occur.

Preliminary Data Sheet Vers. 222060
